

Cryo Co-op

Dear Friend,

Four years ago, I founded the Cryo Co-Op. It was a difficult time. I was grieving. But in these past several years, it's all been worth it. The Cryo Co-Op has made significant strides as the world's leading organization of DIY and at-home life preservation.

Like 2020, this year posed several challenges to the Cryo Co-Op. Simply put, supporters like you are crucial in helping to achieve our mission of life after death.

During the Surgeon General's investigation, it was your encouragement that allowed us to get through a heated witch hunt!

You helped us "Keep a Cool Head" - just like our motto!

During power outages caused by Hurricanes Helene and Milton, we were able to provide generators so members could continue their sub-zero slumber.

And with 2024 breaking a 50-year heat record, it was you who opened up your hearts and garage freezers to those placing a temporary pause on their lives.

Highlighted below are just a few examples of successful efforts by the Co-Op to legitimize the world of Do-It-Yourself Cryonics:

- Volunteers canvassed for Proposition 8 in Montana, which legalized industrial ice water baths and embalming fluids in residential areas.
- Co-Op members utilized the freezer section of an abandoned grocery store in Iowa to house the cerebral matter of two dozen Cryo Co-Op members.
- The Cryo Co-Op's campaign efforts were pivotal during a Missouri election in passing the Ice Cream Man Act. Allowing frozen dessert vendors to sell food from trucks that also contain human remains.

At the Cryo Co-Op, we don't treat our members like just another head in a jar. When you sign our Decapitation Waiver, you become a part of the family!

While this letter is meant to share our victories and provide some holiday cheer, I am also writing to ask for your support.

Enclosed you will find a plastic parcel with postage paid to mail your ice donation to the Cryo Co-op. Your gift of 2 to 3 cubes - or even a full tray - can be the difference in someone receiving life after death or becoming a soggy skull in a shoe box.

Also, as deer hunting season closes, please keep in mind that any empty space in your chest freezer can be utilized to keep our members chilling as they wait for their second life. When you sign up to sponsor a frozen head, we'll send you everything you need - including labels - so your venison doesn't get mixed up with a client's cadaver!

With your help, we can continue to preserve the dream of a new life after death. Happy Holidays and keep it frosty!

- Stan McGannon, Founder/CEO Cryo Co-Op
